

Osama Almamari

Senior IT Infrastructure & Systems Administrator

Jeddah, Saudi Arabia | +966 53 564 1550 | osama.alkadr@gmail.com | linkedin.com/in/osama-almamari-it

PROFESSIONAL SUMMARY

Senior IT Infrastructure and Systems Administrator with 10+ years of experience managing enterprise IT environments, Microsoft 365 platforms, virtualization technologies, network infrastructure, cybersecurity solutions, and ERP systems. Proven expertise in designing and maintaining highly available IT operations, implementing business continuity strategies, leading digital transformation initiatives, and delivering advanced technical support. Experienced in VMware, Microsoft technologies, Active Directory, Cisco networking, Linux administration, Odoo ERP, and disaster recovery planning. Adept at aligning technology solutions with business objectives to improve operational efficiency and service reliability.

PROFESSIONAL EXPERIENCE

IT Officer — Alemlaq For Cars, Jeddah — Aug 2024 – Present

- Managed enterprise IT infrastructure, servers, and network environments to maintain operational continuity and system availability.
- Administered Microsoft Active Directory, Exchange, and SharePoint environments, enhancing user management and platform reliability.
- Implemented backup and disaster recovery procedures to strengthen data protection and reduce service disruption risks.
- Supported Odoo ERP operations and end-user adoption, contributing to process automation and operational efficiency.
- Led telecommunications and VoIP administration to ensure uninterrupted internal and external communications.
- Collaborated with business departments to support digital transformation initiatives and technology-driven process improvements.
- Administered UniFi access points and DrayTek networking devices, improving network availability and supporting day-to-day business operations.
- Administered Hikvision CCTV and ZKTeco access control systems to support physical security and facility management requirements.

Senior IT Officer & System Administrator — Tamdeen Youth Foundation, Sana'a, Yemen — Jun 2018 – Apr 2024

- Managed enterprise IT infrastructure serving over 300 employees across headquarters and multiple branch locations.
- Administered VMware ESXi vSphere and Citrix XenApp environments to optimize application delivery and infrastructure performance.
- Managed Microsoft 365 ecosystem including Exchange Online, SharePoint, Teams, and OneDrive.
- Implemented cybersecurity, firewall, backup, and disaster recovery solutions to strengthen organizational resilience.
- Led IT projects, vendor coordination, and technology procurement initiatives supporting business growth.
- Oversaw website management, surveillance systems, and end-user devices including printers and scanners, ensuring efficient day-to-day operations.
- Administered FortiGate firewalls and MikroTik network infrastructure to enhance network security, optimize connectivity, and support reliable enterprise operations.

System Administrator — Safe Motherhood Specialized Hospital, Sana'a, Yemen Jan 2017 – Apr 2018

- Administered Active Directory, VMware vSphere ESXi, and Veeam Backup & Replication environments to ensure secure and reliable IT operations.
- Oversaw the installation and configuration of computer hardware, software, systems, networks, printers, scanners, and security cameras.
- Troubleshot system and network problems, diagnosing and solving hardware and software faults.
- Maintained and optimized enterprise systems and network infrastructure to support business continuity and user productivity.
- Set up new user accounts and profiles and resolved password issues.
- Prioritized and managed many open cases at one time.
- Provided support, procedural documentation, and reports that gave users the information needed to use systems effectively.

IT Officer — Yemen Family Care Association, Sana'a, Yemen Apr 2014 – Dec 2016

- Administered Active Directory, VMware vSphere ESXi, Veeam Backup & Replication, and Citrix XenApp/XenDesktop environments to support secure and reliable IT services.
- Oversaw IT personnel and projects; determined and implemented IT systems and services.
- Improved IT infrastructure performance through proactive monitoring, maintenance, and optimization initiatives.
- Coordinated, planned, and led computer-related activities and fulfilled the organization's information systems requirements.
- Developed and managed a virtualization server environment and backup solution.
- Designed, deployed, and maintained IP-based surveillance systems to enhance facility security and monitoring capabilities.
- Ensured a reliable primary internet connection with backup internet solutions; configured for high network stability and monitored network speed and committed information rate (CIR).
- Maintained and set up all IT hardware and software: printers, copiers, scanners, laptops, desktops, servers, smartphones, tablets, Windows 10, MS Office, and Outlook.
- Managed the organization's website and social networking sites.

KEY PROJECTS

Enterprise Infrastructure, Telecommunications & Digital Transformation — Alemlaq For Cars 2025

- Led the unification and modernization of network and telecommunication infrastructures across Al-Emlaq, Al-Barq, and Al-Raad companies, improving communication quality and operational stability while reducing management complexity.
- Planned and executed the migration from legacy digital telephony to a unified IP Telephony infrastructure across the three companies, establishing seamless inter-company communication.
- Designed and implemented Business Continuity solutions with secure inter-branch connectivity between the Dammam and Riyadh branches, ensuring uninterrupted operations and high availability.
- Led the development, implementation, customization, and user training of Odoo ERP as an integrated enterprise solution, automating business operations across departments.

IT Infrastructure Deployment & Digital Transformation — Tamdeen Youth Foundation 2022

- Installed and configured a complete network infrastructure for a newly established building.
- Implemented an open-source ERP system for enterprise resource planning and centralized data management.
- Coordinated a new organizational website with an external vendor and managed ongoing content updates.
- Deployed Citrix XenApp, enabling secure remote access to enterprise systems and applications.
- Led the migration of email services to Microsoft 365 (Exchange, SharePoint, OneDrive, Teams), and delivered end-user training across four branches.

Network Infrastructure Design & Virtualization — Yemen Family Care Association 2016

- Migrated physical servers to VMware ESXi vSphere, improving scalability, resource utilization, and disaster recovery while reducing infrastructure costs.
- Developed complete network architecture and integration solutions, including IP-based security camera systems across facilities.

SKILLS

Core Competencies: IT Infrastructure Management · Systems Administration · Microsoft 365 Administration · Active Directory Management · VMware vSphere ESXi · Network Administration (LAN/WAN) · Cybersecurity & Access Control · Backup, Disaster Recovery & Business Continuity · ERP Systems Administration (Odoo & ERPNext) · Technical Support (L2/L3) · IT Project Management · Vendor Management · Digital Transformation Initiatives

Technologies & Tools: VMware vSphere ESXi · Citrix XenApp & XenServer · Microsoft 365 (Exchange Online, SharePoint Online, Teams, OneDrive) · Active Directory · SCCM · Windows Server · Linux Administration · Cisco Networking · MikroTik · UniFi · DrayTek · FortiGate Firewall · Sophos Firewall · Veeam Backup & Replication · Odoo ERP · ERPNext · Hikvision CCTV · ZKTeco Access Control

Personal Skills: Time Management · Organization & Planning · Effective Communication · Problem Solving · Analytical Thinking · Work Under Pressure · Teamwork · Decision Making · Flexibility · Attention to Detail · Leadership · Prioritization · Professional Relationship Building · Self-Motivation · Continuous Development
